operate with model that allows partners to retain their IP

I agree

are an established pharmaceutical, biotechnology, or medical technology company

I agree

Please provide evidence that you possess the capabilities below in no more than 3,500 characters each (approx. 500 words per response)

Experience as an established industry incubator, operated or associated with a pharmaceutical, biotechnology or medical technology company with demonstrated ability of providing a capital-efficient and flexible platform that allows for unadulterated focus of emerging companies to commercialize prospective innovations.

Be able to provide shared laboratory space.

Ability to provide shared laboratory equipment.

Ability to provide shared support space, including conference facilities and office space.

Availability of entrepreneurial programming, as well as access to research and development experts where emerging companies can transform.

Ability to select promising candidates, remove business, financial and operational obstacles, and have a track record of graduating companies for follow-on investment and/or commercialization.

Ability to operate within a non-dilutive, and non-equity model, allowing startup companies to retain full ownership and control of their company and maintain all rights to intellectual property.

Extent of collaboration or integration with a large industry commercialization partner.
